WORK

2016-2017 Backend Developer, Startup Streamcato

0.3 years

Streamcato developed a similar application to Spotify. They received many songs and videos everyday, and my role was to ensure that the data was correctly inserted into the database (ingestion) and was available in the different platforms, such as the dashboard and the mobile apps.

2017-2019 Fullstack Developer, Startup Elecctro

1.9 years

Elecctro is an IoT startup focused on vending machines. I started has a backend developer where I ended up working most of the time creating the rest API endpoints for the web and mobile applications. I also worked in the frontend, helping to create new sections on the dashboard.

2019-2020 Fullstack Developer, Freelancing

1 year

I decided to take a break to focus on my own projects while I didn't find another job. In the past year, I have always been busy, improving my skills, either creating applications or doing interviews. Some of the applications I have made:

Online shop:
